Abbreviations	xvi
General methods	xviii
Chapter 1	
Silver(I) Catalysis in Organic Synthesis: Coupling & Cascade Reaction	1
1.1 Introduction	3
1.2 Ability of Ag(I) to Bind σ & π Center	4
1.3 Silver NMR: Salient Feature	5
1.4 Organic Reactivity of Ag(I)	6
1.5 Coupling Reactions via Ag(I)	7
1.5.1 Multicomponent Coupling	8
1.5.2 Coupling through Silver Acetylide Intermediate	12
1.5.3 Enantioselective Coupling Reaction	19
1.5.4 Homocoupling Reaction	25
1.6 Cascade Reaction	28
1.7 Scope of the present work	40
1.8 References	41
Chapter 2	
Efficient & Facile C-Arylation of N-Tosyl Aziridines via Silver(I) Catalysis	49
2.1 Introduction	51
2.2 Part-A: Alkylation of Arenes & Heteroarenes by N-Tosyl Aziridines Using Silver(I) Diene Complexes	53
2.2.1 Results and discussion	53
2.2.1.1 Synthesis of Catalyst [Ag(COD) ₂]PF ₆	53

2.2.1.2	Initial Success & Optimization Studies	54
2.3	Part-B: Mechanistic Investigation of C-Arylation of N-Tosyl Aziridines: Kinetics & Spectroscopic Studies	60
2.3.1	Mechanistic Investigation	61
2.3.1.1	Hammett Correlation with Substituted Aziridine	61
2.3.1.2	Relating Ligand Cone Angle with ³¹ P NMR Chemical Shift & Initial Rate	63
2.3.1.3	Diagnosis of Ag(I)-Arene Intermediate in Solution via ESI-MS & ¹⁰⁹ Ag NMR Probe	68
2.3.1.4	Effect of Diene Ligands on the Efficiency of Ag(I) Catalyst	71
2.3.1.5	Proposed Catalytic Cycle	73
2.3.1.6	DFT Study to Explain such Type of Reactivity	74
2.4	Summary	76
2.5	Experimental	77
2.5.1	Synthesis of Silver Salts & Complex	77
2.5.2	Synthesis of Substituted Aziridines	77
2.5.3	Experimental Procedure & Kinetics Plot	79
2.5.4	Spectral and Analytical Data of the Coupling Products	87
2.5.5	Crystal Structure Analytical Data of Complex [Ag(COD) ₂]PF ₆	92
2.5.6	Crystal Structure Analytical Data of Compound 6	94
2.5.7	NMR Spectral Images of Some Selected Coupling Products	97
2.5.8	Mass Spectral Images of Silver(I)-CHD & Silver(I)-NBD Species	103
2.6	References	105

Chapter 3

Silver(I)-Catalyzed Tandem Ring-Opening & Ring-Closing in a Cascade	111
--	-----

3.1	Introduction	113
3.2	Results & Discussion	114
3.2.1	Initial Success & Optimization Studies	114
3.2.2	Extending to Various Aziridines/Azetidines & Propargyl Alcohols	116
3.2.3	Comments on Plausible Mechanistic Pathways of Tandem Ring-Opening & Ring-Closing	121
3.3	Summary	122
3.4	Experimental	123
3.4.1	Synthesis of Starting Materials	123
3.4.2	Experimental procedures	124
3.4.3	Spectral and Analytical Data of the Cascade Products	125
3.4.4	Crystal Structure Analysis Data of Compound 23	130
3.4.5	Crystal Structure Analysis Data of Compound 28	131
3.4.6	Crystal Structure Analysis Data of Compound 32	133
3.4.7	NMR Spectral Images of Some Cascade Products	135
3.5	References	143
Chapter 4		
Silver(I)-Catalyzed Aziridine/Azetidine Ring Opening with ‘S’, ‘O’, & ‘N’ Nucleophile		
4.1	Introduction	149
4.2	Results and discussion	153
4.2.1	Ring Opening with ‘O’ Nucleophile	153
4.2.2	Ring Opening with ‘N’ Nucleophile	156
4.2.3	Ring Opening with ‘S’ Nucleophile	159
4.2.4	Correlation of Initial Rate Constant (k) versus Nucleophile	161
4.2.5	Ring opening of Aziridine with Tethered Ethane 1,2-Dinucleophile	162
4.2.6	Proposed Catalytic Cycle	164
4.3	Summary	165

4.4	Experimental	166
4.4.1	Experimental Procedure	166
4.4.2	Spectral & Analytical Data of Coupling Products	167
4.4.3	Kinetics Plot of 2-Phenyl Aziridine with Phenol, Thiophenol & Aniline	177
4.4.4	NMR Spectral Images of Some Selected Coupling Products	178
4.5	References	186
	Conclusion & scope of the future work	189
